# OUR CORE SERVICES

## Transloading of Heavy Oil Products

The seamless transfer of petroleum or coal-based chemical products between railcars of different gauges (broad/standard) via technology that also enables heating.

## Transloading of Light Oil Products

Our separated pumping systems and pipeline routes are designed to prevent any risk of cross-contamination during transfer from standard-gauge railcars to broad-gauge railcars (and vice versa). This process is ideal for handling oil and chemical substances that are sensitive to contamination.

## LPG Transloading

We ensure the safe and reliable transloading of LPG from Slovakia to Ukraine (and vice versa) in compliance with the highest safety standards. We also offer flexible LPG delivery to EU countries via road tankers.

## Agricultural Product Transloading

We handle and temporarily store a wide range of agricultural commodities – grain, feed, and other bulk materials. Our technologies enable fast handling and optimal product quality.

## Transloading of Other Commodities

We provide transloading of various packaged or bulk goods (e.g. wood, metal, loose materials) according to each customer's specific needs. We respond flexibly to requirements for a range of cargo types.

## Storage Capacities

We offer warehousing for transshipped goods that are weather-sensitive in our large-capacity dry storage halls.

## Support and Customs Services

Our transloading services are supplemented by admin and support services, including customs clearance, logistics coordination, and delivery management. These aim to maximally relieve clients of administrative burden.

Such services include:

- **Freight forwarding**
- **Customs declaration services**
- **Preparation of all customs and transport documents (Import-Export-Transit)**
- **Customs debt security**
- **Rail transport (Slovakia-EU) in cooperation with national and private rail carriers**
- **Transport of dangerous goods in accordance with RID**
- **Comprehensive consulting**

We can also handle other light, heavy, or custom-specified products based on customer requirements and our current transloading capabilities.

## WHY CHOOSE SWS?

- **STRATEGIC LOCATION** – We're the gateway between Eastern and Western Europe.
- **TECHNOLOGICAL EQUIPMENT** – Modern facilities and infrastructure.
- **SAFETY AND CERTIFICATION** – High standards for cargo and environmental protection.
- **FLEXIBLE SOLUTIONS** – We adapt to each customer's individual needs.
- **ALL-IN-ONE SERVICE** – Transport, storage, and customs under one roof.
